Waltham, MA

Boston, MA

mcavaretta@morse.law

An experienced business and transactional lawyer, Mike represents a wide range of life sciences, technology, digital media, and other innovation-based companies.

Mike's practice is focused on licensing, strategic and business development transactions, and commercial transactions. He advises clients regarding clinical trial agreements; commercial agreements; strategic alliances, including alliances for co-discovery, co-development, and co-commercialization; intellectual property licenses, including licenses for compounds, processes, platforms, and software; industry collaborations, including manufacturing, formulation, and process collaborations; university collaborations, including clinical trial and other sponsored research agreements, and material transfer agreements; and distribution agreements.

Mike is one of a select group of attorneys to have participated in the National Science Foundation's Innovation Corps (I-Corps) program, which prepares scientists and engineers to extend their focus beyond the laboratory, and broadens the impact of particular, NSF-funded, basic-research projects.

A former in-house lawyer and business development and strategic alliances professional, Mike brings a practical perspective to clients' legal issues with a keen understanding of the importance of agreements that facilitate rather than hinder business.
