

# Morse Serves as Counsel to Maisa in Series Seed Financing

September 03, 2025

Morse is pleased to announce that **Maisa**, an agentic process automation platform helping enterprises streamline complex processes, has closed its Series Seed financing round, led by **Creandum**. This investment supported the launch of Maisa Studio, designed to address common points of failure in enterprise AI.

Maisa Studio is a model-agnostic, self-serve platform that enables users to deploy digital workers trained using natural language. Its unique “chain-of-work” method uses AI to map out processes step-by-step, focusing on how to reach the desired outcome rather than simply generating a response. To further enhance accuracy, Maisa incorporates a HALP system (human-augmented LLM processing), where the AI explains its steps while humans guide and review its work. This combination of transparency and oversight creates more flexible and reliable automation, setting Maisa apart in the enterprise AI space.

Morse attorneys **Scott Bleier** and **Ryan Whelpley** served as counsel to Maisa in this transaction.

Additional details on the investment can be found in [Maisa's press release](#).

Morse focuses exclusively on the core legal services that businesses need to succeed, helping businesses of all sizes — from startups to Fortune 1000 companies — in the service areas of corporate, intellectual property, licensing, employment, taxation, and litigation.
