

Morse Serves as Counsel to Prosper AI in Series A Financing

June 30, 2026

Morse is pleased to announce that **Prosper AI**, the leading AI platform for managing the entire patient journey, has completed a \$30 million Series A financing round. The funding will support the expansion of Prosper AI's engineering and customer-facing teams, deepen integrations with leading EHR platforms, and accelerate adoption across provider groups and health systems.

Prosper AI is a unified platform that streamlines both patient and payer workflows, managing the entire process from appointment request through reimbursement. Leveraging agentic AI, the platform answers patient calls, schedules appointments directly within the EHR, verifies insurance benefits, automates patient billing, and contacts insurers when additional information is needed. By automating the patient journey end-to-end, Prosper AI helps providers reduce administrative costs while giving patients greater visibility into their coverage and financial responsibility before care is delivered.

Morse attorneys **Mike Jabbawy**, **Rick Cocci**, **Ryan Whelpley**, **Claire Driscoll**, **Mike Cavaretta**, and **Justin Emery** served as counsel to Prosper AI in this transaction.

Additional details on the investment can be found in [Prosper AI's press release](#).

Morse focuses exclusively on the core legal services that businesses need to succeed, helping businesses of all sizes – from startups to Fortune 1000 companies – in the service areas of corporate, intellectual property, licensing, employment, taxation, and litigation.
